## Abstract of JP2001245223

**PROBLEM TO BE SOLVED:** To provide a reception device for digital broadcast for appropriate copy control with respect to temporary record, since copy control is not performed on temporary record with respect to time shift viewing in a conventional copy control method for controlling the recording of sound and a picture on the program of digital broadcast and therefore proper copy control is not performed for a content supplier and a viewer. **SOLUTION:** Recording of control for receiving the signal of a system including signals meaning recordable or not on the temporary recording of the program of digital broadcast as temporary recording control information and for temporarily recording or not temporarily recording the received broadcast program according to temporary recording control information is performed.
